

The Book

Detpak

AUGUST 2023

Why Choose Detpak?

Detpak is a family-owned, Australian business with a worldwide network of manufacturing and sales locations. We design, manufacture and supply the food service, grocery and fast-moving consumer goods industry with world-class packaging solutions.

RESPONSIBLE BY DESIGN

With world leading innovation aligned with global sustainability principles, we ensure every product is designed to not just meet the world's best environmental, quality and safety stands but remain ahead of them for years to come.

AN INNOVATION EDGE

With our dedicated innovation studio for concept creation and rapid prototyping, and an agile team of engineering, commissioning and manufacturing leaders, there's no faster way to get new packaging in market.

SUPPLY CHAIN FLEXIBILITY

With owned manufacturing in seven countries, an agile supply chain and a dedicated sourcing team, you can rest assured that when you partner with Detpak, packaging will never be your weakest link.

TRUE PARTNERSHIP

With partnerships of over 50 years with leading global brands, we build trusted relationships that solve the commercial realities of today and can be relied on to deliver on the evolving needs of tomorrow. So don't just choose packaging, choose a packaging partner.

Elevate Your Brand

CUSTOMISE WITH DETPAK

Packaging isn't just a means to hold and transport food products, it's a way to elevate your brands' visibility and enhance your customers' experience. There is no limit to the imagination when it comes to customising your packaging items, with Detpak's comprehensive range of over 1,000 paper, board and fibre packaging solutions customisable to help elevate your brand. From Cups & Cup Accessories, to Cartons, Bags, Napkins, Trays, and Wraps; the biggest brands around the world trust us with their branded packaging solutions.

Choose Sustainable

SUSTAINABLE MATERIALS

At Detpak, we only use paper and board from large, reputable raw material suppliers, which means no old growth forests are used. We keep the use of inks and adhesives to a minimum and prioritise the use of water-based and soy inks wherever possible. As part of our commitment to sustainable sourcing, we use ethically sourced raw materials in all our manufactured products including greater than 70% forestry certified or recycled paper and board.

FROM START TO FINISH

Detpak works with waste management and resource recovery stakeholders to develop increasingly sustainable options for product disposal, including diverting products into recycling and composting streams. As part of our membership of the Australian Packaging Covenant, Detpak is proactive with meeting its obligations under the covenant and promotes resource efficient packaging design; the recovery and recycling of used packaging; and reducing the incidence and impact of litter. The Detpak team can advise you on the best packaging options to suit your packaging end of life expectations.

RESPONSIBLE MANUFACTURING

At Detpak, our purpose is to make a positive impact for our people, our partners and our planet. That's why we work closely with industry bodies, local and federal government, to bring you the best in sustainable packaging. We maintain the most highly recognised global standards for food safety and quality consistency, including ISO 9001, ISO 14001 and BRCS. Our products are manufactured in food grade packaging environments, so our customers can be assured of the highest quality standards.

CARING FOR COMMUNITY

Detpak takes pride in being a manufacturer, not simply an importer. We work to a strict Corporate Social Responsibility Policy, which covers fair wages and working conditions. As a family-owned company, Detpak chooses to positively impact our local communities all around the world, from our headquarters in Adelaide, to supporting initiatives in the countries where we operate, and beyond. Many of our charitable initiatives focus on improving communities in a long term, sustainable way.

Australia, we've g

Australia is taking action against single-use problematic plastics (SUPPs).

Legislation continues to be introduced throughout 2023 and further bans are expected as we progress to the Towards 2025 National Packaging Targets.

We're staying ahead of legislative changes, so you can feel confident we've got you covered.

Our extensive range of recyclable and compostable packaging solutions offer sustainable alternatives suitable for your location.

**WE MAKE RESPONSIBLE CHOICES,
TO MAKE YOUR CHOICE EASY**

got you covered.

No added PFAS

Introducing Vanguard® by Eco Products® from Detpak. A market leading line of no added PFAS sugarcane packaging including moulded fibre plates, bowls, and containers.

What is PFAS?

PFAS (per- and poly-fluoroalkyl substances) are a group of chemicals used in a range of applications in common household items, to provide them with water, heat, sticking or grease resistance properties. PFAS are considered forever chemicals as they remain present in organisms and the environment indefinitely.

Products Containing PFAS

Over 90% of Detpak's products don't contain PFAS, with all remaining products with greaseproof properties transitioning by end of 2023. This is in alignment with the Australian Packaging Covenant (APCO) voluntary action plan to phase out PFAS in fibre-based food contact packaging in Australia.

Vanguard®

Using proprietary alternative compounds to achieve grease-resistance without relying on conventional PFAS, the Vanguard® range demonstrates our continued commitment to packaging innovation. Vanguard® is certified to EN 13432, BPI and OK Compost Industrial and Home Certification Standards with Australian Standards certifications AS 4736 (Commercial) and AS 5810 (Home) in progress, due in late 2023.

Launching in August 2023 with an initial selection of nine items across clams, bowls, portion cups and plates, with a further nine items being added in September 2023. The full Eco-Products® from Detpak range will transition to Vanguard® by the end of 2023.

Bags

TAKEAWAY & CHECKOUT BAGS

Takeaway and Checkout Bags are constructed from heavyweight materials for holding multiple items. They are free-standing and easy to load.

FOOD TRAYS & CLAMS

Food Trays are sturdy and grease resistant and can be used for a variety of different foods. They are pre-formed, so food can be loaded straight in. Some food trays are polylined to provide extra grease resistance, these are not compostable or recyclable. Clams are made from claycoat board, and include vent holes, to ensure food won't get soggy.

SUGARCANE CLAMS

Sugarcane Clams are sturdy and ideal for use with hot, cold and greasy foods. The sugarcane retains temperature but is breathable, keeping foods hot and crispy. These clams are fridge, freezer and microwave safe and ovenable for up to 220°C for 20 minutes.*The moulded corners ensure these clams are strong and securely stackable with a smooth lid.

New Vanguard Range, available now

Understanding our Packaging Terms

What is 'Sustainably Sourced'?

The paper or board materials used in our products are responsibly sourced, and the supplier has been audited for evidence of sustainable and ethical practices. Our range of Eco-Products® is made from either renewable resources or post-consumer recycled content.

What is 'No Added PFAS'?

A product that has not had PFAS added. PFAS (per- and poly-fluoroalkyl substances) are a group of forever chemicals used to provide common products with water, heat, sticking or grease resistance properties.

What is 'Recyclable'?

A product or material is recyclable if it can be collected and re-manufactured into a new product. If a Detpak product is listed as recyclable, it means this product can be readily recycled via kerbside recycling streams once food residue has been removed.

What is 'Compostable'?

Our compostable packaging is made from organic materials that break down naturally in optimal conditions, leaving no toxic residue. Microorganisms, humidity, and heat is required to break packaging down effectively and when combined with green waste and food scraps, can create a nutrient dense compost to improve our soils.

Detpak's range of paper and unlined board products are readily compostable and for all other items, various global certification standards exist, enabling consumers to understand how to responsibly dispose of their packaging. Certain packaging requires commercial composting facilities with the right amount of heat and moisture to break down, and other items may be compostable in a home compost environment. We recommend you check with your local council re acceptance of food soiled compostable packaging through green waste collection.

Commercial Compostability

AS4736 - Australian Standard Certification
EN 13432 - European Certification

Home Compostability

AS 5810 - Australian Standard Certification

Our Materials

Paper and wood

Our paper and board is sourced only from responsible forestry, meaning no old growth forests are used. We use quality papers and board when making all our products for premium quality assurance.

PLA (Polylactic Acid)

Polylactic acid is a bioplastic derived from cornstarch. It is a rapidly renewable resource and can be certified as industrially compostable. Our PLA options include CPLA (crystallised polylactic acid) or PLA-lined packaging.

Sugarcane (Bagasse)

Sugarcane bagasse, a byproduct from sugarcane production, is an example of fibre-based packaging and is a rapidly renewable resource. Our sugarcane can be certified as either home or industrially compostable.

Plastic

Our traditional plastic options include cups, lids and bowls and are made from PET, polystyrene or polypropylene. These items are marked with a Plastics Identification Code (PICs) between 1 and 7, which denotes the type of plastic used to make the product.

How we measure our products

Measurements throughout The Book are displayed in millimeters.

Bags & Wraps

L x W x G
Length x width x gusset (where applicable)

Bowls

L x W x H
Diameter x diameter x height

Cartons & Trays

L x W x H
Length x width x height

Sustainably Sourced	When you see this statement, it refers to the definition above, 'What is Sustainably Sourced?'
# No Added PFAS	When you see this statement, it means that the product with # symbol against it is the No Added PFAS item within that range.
^ Compostable	When you see this statement, it means that the product with ^ symbol against it is the Compostable item within that range.
+ Recyclable	When you see this statement it means that the product with + symbol against it is the Recyclable item within that range.
